Features
    *Remote Controlled Color Changing RGB Strip Light

    *Make The Strip Any Color You Want or Use Color Changing Effects

    *Easy Installation In Minutes

    *4 year Warranty

    *50,000+ hrs life span

    *Flexible strip with 3M self adhesive back for easy installation

    *CE & RoHS Certification

    *150 LEDs for 5 meters reel (about 2 LEDs per inch)

Installation:

1) Check that there are four pins attached to each side of the reel.

2) Insert the four pins on the side of the reel to the IR transformer. The arrows should be pointing toward each other.

3) Connect AC power cord to the transformer. The lights should come on.

4) Use the remote controlled color selector to manage colors on the reel. The control should be directed toward the black little sensor on the IR Controller.
